Abstract (en)  
[origin: WO2019016483A1] The invention concerns a rear diffuser (2) of a motor vehicle, comprising at least one movable panel (6) that can move between a deployed position and a retracted position when the rear diffuser (2) is attached to a bodywork part (4) of the motor vehicle, the rear diffuser (2) comprising a motorised mechanism capable of allowing a part of the movable panel (6), in the deployed position, to be pressed against the bodywork part (4) when the rear diffuser (2) is attached to the motor vehicle bodywork part (4).
