Abstract (en)
[origin: WO2019228954A1] A pleated shade (1) for a window (3) or a door comprises: - a piece of sheet material (2) which can be pulled apart and pushed together and is multiply pleated, more particularly has a plurality of substantially parallel folds (16); - at least one terminating strip (5) arranged at an end of the piece of sheet material (2); and - two telescoping guide rails (6), which run in parallel with each other and perpendicularly to the at least one terminating strip (5) and which can be attached to a window (3) or a door. The at least one terminating strip (5) is guided for sliding along at least part of the telescoping guide rails (6) in the longitudinal direction (L). Each telescoping guide rail (6) comprises at least two guide strips (11, 12), which can be slid relative to each other in the longitudinal direction (L) and are spring-preloaded from each other in the longitudinal direction (L).
