Abstract (en)

[origin: WO2019015849A1] The invention relates to a concept for monitoring a parking space using a plurality of environment sensor devices, wherein said plurality of environment sensor devices are arranged within the parking space in a stationary manner and are monitoring a common area of the parking space. Only if all the environment sensor devices detect that the area cannot be freely traveled by a motor vehicle, is it determined as the overall result that the area cannot be freely traveled by a motor vehicle.
