Abstract (en)  
[origin: EP3656235A1] A garment prevents a wearer from moving a shoulder forward to put an arm in front of the trunk. The garment (1) includes a body (2) with front and rear bodies (12). The right sleeve (3) is connected with the right armhole (8) and, when longitudinally stretched by 10 %, generates a longitudinal tension of 25 cN or more. The left sleeve (4) is connected with the left armhole (9) and, when longitudinally stretched by 10 %, generates a longitudinal tension of 25 cN or more. A first upper area (17) of the rear body (12) with four corners at the upper and lower ends of the right armhole (8) and the left armhole (9) has a minimum horizontal width shorter than a second upper area (13) of the front body with four corners at the upper and lower ends of the right armhole (8) and the left armhole (9).
