Abstract (en)

[origin: EP3656728A1] A load carrier locking arrangement (100) for securing a load carrier (10) on a load holder (4) of a lift truck (1);- a gripping device (200) having first and second grip claws (201, 202) with a respective gripping portion (201.1, 202.2) arranged to hold a portion (15) of a load carrier (10), and movable towards and away from each other so that a portion (15) of a load carrier (10) may be received there between, wherein the load carrier locking arrangement (100) comprises an actuator (400) with a movable locking element (402) that may be brought into engagement with the gripping device (200), wherein the gripping device (100) is arranged such that the first and the second gripping portions (201.1, 202.1) are prevented from moving away from each other when the locking element (402) is in engagement with the gripping device (100).
