Abstract (en)
[origin: EP3656954A1] A vehicle door handle assembly (40) for a door (12) of a vehicle (10), the vehicle door handle assembly (40) comprising a first handle portion (41) and a second handle portion (42), the first and second handle portion (41, 42) together forming a graspable handle, wherein the vehicle door handle assembly (40) further comprises a door release member (43) to which each of the first and second handle portion (41, 42) are operatively coupled, wherein the first and second handle portion (41, 42) move together when the handle is pulled away from the vehicle (10), the door release member (43) moving with the second handle portion (42) to release the door (12), and wherein the first handle portion (41) moves relative to the second handle portion (42) when the first handle portion (41) is pushed towards the vehicle (10), the door release member (43) being operatively coupled to the first handle portion (41) such that the movement of the first handle portion (41) relative to the second handle portion (42) causes movement of the door release member (43) to release the door (12).
