Abstract (en)
[origin: WO2019020174A1] The invention concerns a slider (100) for a zip fastener comprising a hasp (115) and a pull tab (120), the assembly being moulded into a single block, the pull tab (120) comprising an eyelet (121) for connecting to the hasp of the slider, characterised in that: a. the pull tab (120) comprises a locking eyelet (122) the opening plane of which is parallel to the opening plane of the connection eyelet (121); b. the pull tab (120) comprises a portion (125) for connection between the two eyelets (121, 122), called the pull tab body, the width of the cross-section of the pull tab body in a direction perpendicular to the opening planes of the eyelets is greater than or equal to the height of the cross-section in the plane parallel to the opening planes of said eyelets.
