Abstract (en)
[origin: WO2019020294A1] The invention relates to a drawer structure (100) for storing a holding body (10) on and/or in a storage device (102) in such a way that the holding body can be removed without tools, the drawer structure (100) comprising: a first drawer guide (104) having a first drawer body (106) to be rigidly fastened to a first side of the storage device (102) and having a second drawer body (108) movably attached to the first drawer body (106); a second drawer guide (110) having a first drawer body (112) to be rigidly fastened to a second side of the storage device (102) and having a second drawer body (114) movably attached to the first drawer body (112); a connecting structure (116), which connects the movable second drawer bodies (108, 114); and coupling structures (118), which are designed to be brought into operative connection, in particular into engagement, with corresponding coupling structures (34, 40) of the holding body (10) in order to store the holding body (10) on the drawer structure (100) in such a way that the holding body can be removed without tools.
