Abstract (en)

[origin: WO2019020379A1] The invention relates to a storage box (10) for small parts, in particular screws, comprising a base (74) and at least two lateral walls (14, 16), which extend from the base and lie opposite each other. The base and/or the lateral walls have at least one support flange (20) for stacking multiple identical storage boxes. When two storage boxes are stacked, the lower end region of the first (14) lateral wall of the upper storage box is parallel to the upper end region of the first lateral wall (14) of the lower storage box, and the lower end region of the second lateral wall (16) of the upper storage box is parallel to the upper end region of the second lateral wall (16) of the lower storage box, wherein at least one of the lateral walls is equipped with at least one bar (36, 38), which can be moved between a release position and a locking position and which secures together two storage boxes stacked on top of each other in the locking position and releases same in the release position.
