Abstract (en)

[origin: WO2019020631A1] The invention relates to a cushioning material (10) for packaging purposes comprises at least one planar element (12), which has at least one edge portion (20a-d) and a cushion portion (16), which provides a property desired for protecting an object (26) to be packaged. According to the invention, on at least one edge portion (20a-d), an adhesive system (22) is applied at least in some regions, which adhesive system is designed for a connection to another portion (20a-d) of another planar element (12) or of the same planar element (12), which connection can be nondestructively released without aids.
