Abstract (en)

[origin: WO2019020838A1] Vacuum chamber for a gripper, comprising at least one fixing plate and at least one pneumatic accessory fixed in an opening in the fixing plate, characterized in that the pneumatic accessory is held in the opening by an elastically deformable tubular interface comprising an external groove in which the periphery of the opening is housed so as to provide sealing between the plate and the interface, the interface delimiting a passage extending between a first end of the interface extending into the chamber and a second end extending to outside the chamber, at least part of the pneumatic accessory being inserted in the passage of the interface.
