Abstract (en)
[origin: WO2019020929A1] The invention relates to a thermographic system comprising means for capturing infrared images, a radiation source and a conduit (18) for guiding the radiation in a longitudinal direction (L) to an outlet of the conduit (18) that is located level with a free edge (28) thereof, characterized in that the free edge (28) of the conduit (18) is deformable along the longitudinal axis (L) in a first direction (L1) that is oriented from the outlet of the conduit (18) in the direction of the image capture means (12) and in that it comprises means for returning the free edge to its initial shape and means for keeping said free edge of the conduit (18) in a deformed state.
