Abstract (en)  
[origin: EP3659942A2] The utility model relates to devices, in particular to packages, bags or containers, and specifically to a package for the transportation of bottles and can be used individually by consumers. The technical result which the utility model is designed to produce is an increase in the functionality of the device by making it easy to clean spilled liquid from the device and by providing the capability of rapid repeated use. The technical result is achieved in the device, said device being in the form of a first bag which is of a water-impermeable design and is open in the upper part thereof, characterized in that the first bag contains therein a smaller, second bag made of bubble wrap, which is open in the upper part thereof and is fixed with the aid of a detachable joint.
