Abstract (en)  
[origin: WO2019025626A1] The invention relates to an adapter (1) for receiving a capillary (3), comprising - a passage (2), into which the capillary (3) is or can be received, - an adapter cone (4), which is designed for receipt in or on a correspondingly designed counter cone (7), characterized in that - the adapter cone (4), at least over a section (4.2) for bringing the adapter cone into contact with the counter cone (7), consists of an elastic material (10) that is more elastic than the material of the counter cone (7). The invention further relates to a counterpart (6) for connecting to the adapter (1), to a device (13) and to a method for automatically exchanging capillaries (3).
