Abstract (en)

[origin: WO2019025486A1] The present invention relates to a method and a coating material (10) for coating a surface, particularly a narrow side of a plate-shaped workpiece (W), which preferably consists, at least in part, of wood, wood materials, wood substitute materials, plastic or the like, said method comprising the following steps: supplying a coating material (10), wherein the coating material (10) has a recess (10a) extending in a longitudinal direction of the coating material (10), and; applying the coating material (10) to at least one surface (W1) of a workpiece (W) to be coated, wherein the workpiece (W) has, on the at least one surface (W1) to be coated, a profile (P), which is complementary at least in part to the recess (10a).
