Abstract (en)  
[origin: WO2019025178A1] The present invention relates to a functional element (5) having electrically controllable optical properties, which comprises a stack of components in the following order: at least - a first carrier film (15), - an active layer (11), and - a second carrier film (14), at least part of at least one exit surface (8) of the active layer (11) on at least one lateral face (5.1, 5.2, 5.3, 5.4) of the stack of components of the functional element (5) being sealed with a barrier material (4).
