Abstract (en)

[origin: CA3068904A1] The invention relates to a ceiling formwork and a method for producing a ceiling element (2), comprising the following steps: - arranging two ceiling supports (3) on a floor (23), - connecting a first end region (4) of a ceiling formwork frame (5) to the two ceiling supports (3) such that the ceiling formwork frame (5) is arranged in an intermediate position inclined downward from the first end region (4) in the direction of a second end region (7), - connecting a lost ceiling plate (8) to the ceiling formwork frame (5) arranged in the intermediate position, - pivoting the second end region (4) of the ceiling formwork frame (5) up, together with the lost ceiling plate (8), - supporting the second end region (7) of the ceiling formwork frame (5) that has been pivoted up by at least one additional ceiling support (6) and - casting the ceiling element (2), together with the lost ceiling plate (8), on the ceiling formwork frame (5).
