Abstract (en)

[origin: WO2019025405A1] The invention relates to an optical arrangement (200) comprising a stacked structure (201) having at least three prisms (221-223). The optical arrangement (200) also comprises a main optical path (250) and a secondary optical path (251-253) for each of the prisms (221-223). The secondary optical path (251-253) runs through the corresponding prism (221-223), is connected to the main optical path (250) by means of partial reflection (272) of light and is subject to total reflection (271) at a further surface of the corresponding prism (201 20-223).
