Abstract (en)  
[origin: EP3663547A1] The crankshaft 61 is located on the one side Do1 of the axis Lc of the cylinder 511, thereby ensuring space on the other side Do2 of the axis Lc of the cylinder 511. This space is used effectively by arranging the upper end portion 55T of the reservoir part 55 on the other side Do2 of the axis Lc of the cylinder 511 in such a manner that the upper end portion 55T overlaps the crankshaft 61 as viewed from the offset direction Do. This makes it possible to limit size increase of the engine 5 while ensuring a large reservoir capacity for the engine oil.
