Abstract (en)
[origin: WO2020115043A1] The invention relates to a constituent header (3) of a heat exchanger, the header (3) comprising at least one header plate and a cover (14) that jointly delimit an internal space (11), and at least one partition (10) that divides the internal space (11) into two sections (11a, 11b), the header (3) having an internal face (12) bordering the internal space (11) and an external face (13) oriented towards the outside of the header (3), the internal face (12) comprising at least one housing (16) for receiving the partition (10), the internal face (12) having at least one cavity (18) and one protrusion (19), the protrusion (19) being interposed between the cavity (18) and the housing (16) for receiving the partition (10).
