Abstract (en)
[origin: WO2019030162A1] The invention relates to a high-chair (10) for children, comprising a height-adjustable support system (12, 13, 14) for supporting a part of the body of the child, said support system comprising a height-adjustment system having a locking system (20) that locks an adjusted height, at least in part, and more particularly predominantly, by a frictional connection.
