Abstract (en)

[origin: WO2019030047A1] The invention relates to a device for producing a hot-rolled strip (2), comprising a hot-rolling device (3) for rolling a hot-rolled strip (2), comprising a coiler (4) for coiling up the hot-rolled strip (2) rolled in the hot-rolling device (3), and comprising a cooling section (5) for cooling the hot-rolled strip (2), which is arranged between the hot-rolling device (3) and the coil (4) and which has a run-out roller table (6) for conveying the hot-rolled strip (2) in a conveying direction (F), wherein the cooling section (5) has at least one strip drive apparatus (7), via which a tensile stress in the conveying direction (F) can be applied to the hot-rolled strip (2), wherein the cooling section (5) has a position adjusting apparatus (8) for adjusting a position of the strip drive apparatus (7) in a direction parallel to the conveying direction (F) of the hot-rolled strip (2).
