Abstract (en)

[origin: WO2019029962A1] The invention relates to an adhesive mat (FKM) for sticking a tile (F) onto a wall (W), said adhesive mat having a panel-side adhesive layer for integrally bonded connection with the tile and a wall-side adhesive layer for sticking onto the wall. In this way, tiles can be handled in a clean and dry manner. The adhesive mat (FKM) can be connected to a tile in the factory, thus making a tile unit. The adhesive mat (FKM) can have at least one protrusion over the edge of the tile, such that several tile units of this kind can be arranged in a grid pattern with the adhesive mats overlapping.
