Abstract (en)

[origin: WO2019029801A1] The present invention relates to a system and method for improved defrosting of evaporators of refrigerators. The present invention more particularly relates to a refrigeration appliance (1) comprising a freezer compartment (2) and a fresh food compartment preserving food items, said refrigeration appliance (1) further having a refrigeration circuit circulating a compressed refrigerant at a predetermined temperature and pressure, said refrigeration circuit having a fresh food compartment evaporator (4) and a freezer evaporator (3).
