Abstract (en)

[origin: WO2019032017A1] According to embodiments herein a method performed by a radio network node (12) for handling communication of a wireless device (10) in a wireless communication network (1) is herein provided. The radio network node configures the wireless device (10) to perform a beam recovery process in one cell of a configured set of cells, wherein the configured set of cells includes a primary cell and a set of neighbor cells.
