Abstract (en)
[origin: WO2019029798A1] The present invention is related to a system (1) for operating an electronic light arrangement (2), comprising: - the light arrangement (2) with one primary group (2a) and at least one secondary group (2b) of light-emitting devices (30), - an electronic buck-boost-device (10) which is electrically connected to the primary group (2a) for providing a first constant current to the corresponding light-emitting devices (30) of the primary group (2a), - at least one electronic buck-device (20) which is electrically connected to the at least one secondary group (2b) for providing a second constant current to the corresponding light-emitting devices (30) of the secondary group (2b).
