Abstract (en)
[origin: JP2020093092A] To provide an adjustable bracelet clasp.SOLUTION: A bracelet clasp of the deployant buckle type comprises a first strip 2 and a second strip 4 that are articulated to one another between a closed position for wear and an open position, the first strip carrying a member for attaching a first bracelet strand, the second strip including, at its second end, means for adjusting the length of the bracelet, the clasp further comprising at least one locking member for holding the first and second strips in their closed position. The length adjustment means include a bar 30 movable relative to the second strip and carrying a stud 32 intended to be inserted into a hole in the bracelet to define a point of anchoring of the stud to the clasp, the movable bar 30 being able to move and define at least two positions associated with a useful length of the bracelet.SELECTED DRAWING: Figure 2
