Abstract (en)
[origin: JP2020093094A] To provide an adjustable bracelet clasp.SOLUTION: A bracelet clasp of the deployant buckle type includes a first strip and a second strip 4 that are articulated to each other between a closed position for wear and at least one open position, the first strip carrying a member for attaching a first bracelet strand, the second, lower strip 4 having a loop member 28 at its second end, the loop member 28 defining a passage for a second bracelet strand and carrying a stud 30, the stud 30 intended to be inserted into a suitable hole in the bracelet strand to define an anchoring point of the stud 30 to the clasp, the clasp further including at least one locking member for holding the first strip and second strip 4 in their closed position, where the stud 30 is movable with respect to the loop member 28 and includes an actuator 34 arranged to move the loop member 28 thereby defining at least two predefined positions.SELECTED DRAWING: Figure 2
