Abstract (en)
[origin: EP3669685A1] The invention relates to a fixation clip (7) for a respirator mask (1), in particular a nose fixation clip, the fixation clip (7) comprising an elongated clip element (8) having an U- or V-shaped arrangement with at least one flexible portion (9) that allows an elastic deformation of the clip element (8) for providing a pretension on the respirator mask (1). It is provided that at least one flexible portion (9) of the clip element (8) is designed as bistable hinge connection (15) that provides an instable sticking point between two stable arrangements of the clip element (8), one stable arrangement being the U- or V-shaped arrangement and another stable arrangement being an at least essentially flat arrangement.
