Abstract (en)
The invention relates to a method and device for manufacturing a brick strip with a stretcher face and/or a header face that have the appearance of those of a brick, preferably a hand-shaped brick, in which a malleable raw material (1) is moulded between at a moulding face (3) of a mould (2) and a counter-moulding face (9) of a counter mould (8) by moving the mould (2) and the counter mould (8) towards each other with the malleable raw material (1) between the mould (2) and the counter mould (8) into a closed position with moulded malleable raw material (1) between the mould (2) and the counter mould (8), wherein the moulded malleable raw material (1) is made to dry in the mould (2), after which the dried moulded malleable raw material (1) is removed from the mould (2) and then fired.
