Abstract (en)
The present invention pertains to a device (22) for determining a content of a storage unit (14; 18) which is configured to store and supply a medium for an application-specific use, wherein the device (22) comprises a measuring unit (24; 26) for determining a remaining content stored in the storage unit (14; 18) and a controller (28) for processing the determined remaining content so as to calculate an application-specific parameter being indicative of a remaining service performance of the storage unit (14; 18) for the application-specific use.
