Abstract (en)
[origin: ES2768073A1] Cooking system. The present invention relates to a cooking system (10a-b), in particular an induction cooking system, with at least one extractor fan unit (30a-b), which partially or completely sucks the vapors that are generated in at least one operating state of at least one cooking area (32a-b), and with at least one support unit (34a-b), which has at least one area for housing the electronics (36a-b) that is intended to partially or completely house at least one electronic unit (38a-b). In order to provide a generic cooking system with better properties in terms of its construction, it is proposed that the support unit (34a-b) present at least one fan housing area (40a-b), which is provided to partially or completely house at least one element (42a-b) of the extractor fan unit (30a-b).
