Abstract (en)  
[origin: WO2004104498A2] The invention relates to a heat-insulated container (01) used, in particular for transporting and provided with a wall (02) completely enclosing the internal space (07) thereof which comprises at least one lockable opening and is insulated against heat exchange by a vacuum insulating element (24). Said invention is characterised in that the container (01) is provided with at least one passive melting storage element (16,17) filled with a melting storage material.
