Abstract (en)

The present invention relates to a method of producing parts of a low, medium or high voltage transformer. The method comprises:providing a set of parameters for at least one internal part or insulating body of a transformer to be located at a customer's site;sending at least one instruction order to one or more additive manufacturing printers, wherein the at least one instruction order is based on the set of parameters;producing by the one or more additive manufacturing printers the at least one internal part or the insulating body, the production comprising utilisation of the set at least one instruction order; andproviding quality information on the manufactured at least one internal part or the insulating body.
