Abstract (en)

[origin: WO2019038188A1] The invention relates to an omnidirectional mobile driving platform (1), comprising at least one separate working device (8) and an individual working controller (8.1) for controlling the working functions of the working device (8), wherein the control device (5) of the omnidirectional mobile driving platform (1) is designed and configured such that, in consideration of control commands of the working controller (8.1) of the working device (8), it autonomously navigates the omnidirectional mobile driving platform (1) on a floor according to its environment.
