Abstract (en)

[origin: WO2019037838A1] The invention relates to a use of a Q&P steel for producing a shaped component (2) for high-wear applications, wherein the Q&P steel has a hardness of at least 230 HB, in particular at least 300 HB, preferably at least 370 HB, and a bending angle α of at least 60°, in particular at least 75°, preferably at least 85°, determined according to VDA238-100, and/or a bending ratio of $r/t < 2.5$, in particular $r/t < 2.0$, preferably $r/t < 1.5$, wherein t corresponds to the material thickness of the steel and r corresponds to the (inner) bending radius of the steel.
