Abstract (en)
[origin: WO2019037859A1] The invention relates to a water outlet for installation in a recess in a wall, having an inner pipe designed as a through pipe, an outer pipe (2) designed as a discharge pipe (2), wherein the outer pipe (2) encloses the inner pipe, at least in part. The water outlet also has a connection unit (4), wherein the connection unit (4) comprises a connection plate (40) and a bezel (44), wherein the inner pipe is arranged on the connection plate (40) and wherein the bezel (44) is spaced at a distance from the connection plate (40) around the outer pipe (2). The outer pipe (2) can be displaced along a longitudinal axis (L) and a fixing means (3) is provided, which can be used to fix a previously set relative position between the inner pipe and the outer pipe (2), the fixing means (3) being arranged between the connection plate (40) and the bezel (44).
