Abstract (en)

[origin: WO2019038011A1] The present invention relates to a cooking device (1) comprising an oven cavity (2) wherein the foodstuffs to be cooked are placed; a body (3) in the form of a box with the front side open, that surrounds the oven cavity (2), and a control system (4) that is disposed on the body (3) and that has electronic components thereon that enable the cooking process to be controlled, wherein a cooling system (5) is provided on the body (3), sends the fluid therein towards the control system (4) and enables the control system (4) to be cooled by means of the heat transfer between the control system (4) and the fluid.
