Abstract (en)
[origin: WO2019038004A1] The invention relates to a steam cooking appliance comprising an evaporator unit (120) which has a water container (122) and using which water can be evaporated using a heating body (130) and the steam produced by the evaporator unit can be supplied into a cooking chamber muffle (40) of the steam cooking appliance. According to the invention, a wall portion (124) of the water container (122) is positioned substantially flush with a wall portion (42) of the cooking chamber muffle (40).
