Abstract (en)  
[origin: WO2019067134A1] Methods, systems, devices and computer software/program code products enable efficient handling and remedying of unreliable sensor data, such as data captured by cameras in a virtual 3- dimensional (V3D) imaging or communications system; and enable, in a visual communications system involving a plurality of display devices usable by respective users, synchronization to a common space, and display of images by a receiving device in an orientation independent of the angle at which the receiving device is held.
