Abstract (en)

[origin: WO2019096703A1] The invention relates to an animal care and/or cleaning device for bovids such as tailed cattle, which comprises a drivable brush (2) that consists of a plurality of bristles and is mounted by a bearing device (14) so as to rotate about a rotational axis (3), characterised in that the outer contour and the dimensions of said brush (2) relative to the largest brush diameter (BD) and the brush height (BH), transversely or longitudinally to the rotational axis (3) of said brush, are selected so as to avoid unintentionally winding up the tail or parts thereof when the brush (2) is revolving.
