Abstract (en)

[origin: WO2019046178A1] A method of creating a disposable absorbent article sample for lab testing is described. The method includes providing a disposable absorbent article, applying the template to the disposable absorbent article such that the disposable absorbent article is exposed through the open area, and wherein the open area comprises a first open section and a second open section, the first open section and the second open section being discontinuous from one another, spraying reactive composition on the template covering the open area or areas.
