Abstract (en)  
[origin: WO2019043034A1] The invention relates to a snow and/or ice shower (1) comprising a first snow and/or ice generating device (2a), which has an ice machine (3) that has an ice dispensing region (3a). The ice machine (3) is designed to generate ice (4) and dispense same out of the ice dispensing region (3a). The at least one first snow and/or ice generating device (2a) comprises a supply and/or storage container (9). The ice dispensing region (3a) of the ice machine (3) opens into the supply and/or storage container (9). The at least one first snow and/or ice generating device (2a) comprises a grinding device (10) which is designed to comminute the ice (4) in the supply and/or storage container (9). The grinding device (10) comprises a grinding mill (11) and a grinding screen (12), wherein the grinding mill (11) is movably arranged relative to the grinding screen (12) and can be rotated about a rotational axis (13), whereby ice (4) which can be supplied to the grinding device (10) can be pressed through the grinding screen (12) by the rotation of the grinding mill (11) and can be dispensed in a collection region (16).
