Abstract (en)

[origin: WO2019120835A1] The invention relates to the technical field of the treatment of exhaust gases containing sulfur oxides, in particular exhaust gases from technical combustion installations, what are referred to as flue gases, or exhaust gases from technical processes, such as those of steel production (for example, blast-furnace gas, etc.). In particular, the invention relates to a method for treating exhaust gases containing sulfur oxides, in particular from technical combustion installations, such as flue gases, or from technical processes, in order to remove and/or separate out the sulfur oxides or in order to reduce the sulfur oxide content. The invention further relates to a device for carrying out the method.
