Abstract (en)
[origin: WO2019043090A1] The invention relates to a motor vehicle impact absorption module, comprising a rigid structure, that is to say a structure that does not deform under the effect of a small impact, intended to be positioned on the vehicle such that a front face of the rigid structure is located facing an internal face of a body skin, the module comprising a small-impact absorber formed by a corrugated web overmoulded on the front face of the rigid structure, perpendicularly to this rigid structure.
