Abstract (en)

[origin: WO2019043062A1] The present invention relates to a drain valve for continuous disinfecting a drain valve configured for sanitary elements without overflow. The drain valve comprises a plug, a drain flange, a fastening unit and a drain valve inner surface. The drain flange is adapted for being arranged through an evacuation hole in the sanitary element. It furthermore relates to the use hereof and methods for disinfecting drain valves to eliminate the build-up of bacteria and other germs.
