Abstract (en)

[origin: EP3677143A2] The present invention relates to a tip applicator and a cosmetic ingredient applying device having the same. According to the present invention, the tip applicator, which applies a cosmetic substance to a user's skin, includes: a body having a given shape; and a plurality of functional surfaces formed on the side periphery of the body, wherein two functional surfaces adjacent to each other among the plurality of functional surfaces have different widths on at least a portion thereof in a direction parallel with a circumferential direction of the body.
