Abstract (en)
[origin: WO2019048895A1] Floor mat arrangement for riding places, comprising a plurality of mutually interconnected grid elements (10) and a cover layer (18) positioned on the top of the grid elements (10) in which the grid elements (10) each comprise a plurality of through going holes (13), wherein in a number of the openings (13) respective cups (14) are positioned so that the open upper side of the cups (14) face upwards to the cover layer (18), wherein the combined volume of the cups (14) determines the water storage capacity of the arrangement, and the number of the cups (14) is determined in correspondence with the water supply need of the riding place to ensure the required humidity thereof.
