Abstract (en)

[origin: WO2019048788A1] Floating structure comprising at least a first bridge (11) and an intermediate load-bearing wall (12), the floating structure comprising a tank (1) suitable for containing liquefied combustible gas and arranged below the intermediate load-bearing wall (12), at least one pipe (2, 3) connecting the tank (1) to the management device (7) and a connection device (5) comprising one or more isolation valves (4) arranged on the one or more pipes (2, 3) and an enclosure (6) enveloping the one or more isolation valves (4) in a sealed manner, in which the tank (1) is a tank with a membrane integrated into the shell and the connection device (5) is arranged above the intermediate load-bearing wall (12) and at least partially under the first bridge (11) in a space set up as a cofferdam.
