Abstract (en)

[origin: WO2019048656A1] The invention relates to a device (1) for filling a container (100) to be filled with a filling product and for closing the filled container (100) with a container closure, comprising a treatment chamber (2) for receiving a mouth (110) of the container (100) to be filled in a sealing manner, a filling body (4) for filling the container (100) received with the mouth (110) thereof in the treatment chamber (2), a closing body (5) for closing the container (100) received with the mouth (110) thereof in the treatment chamber (2), once it has been filled, with a container closure, and a compression gas valve (6) communicating with the treatment chamber (2) for introducing a compression gas into the treatment chamber (2), a vacuum valve (7) communicating with the treatment chamber (2) being provided for generating a vacuum in the treatment chamber (2).
